## Super Solar Recycler

OWI, Inc.® - Think twice before discarding that 1985 CD-ROM, don't throw away that aluminum can, and pick up that plastic bottle left under the couch. We can use them with our state-of-the-art, eco-friendly educational toy kit that will stretch your child's imagination while allowing them to take part in the joy of recycling. The **Super Solar Recycler Kit** is powered completely by natural light so you never have to worry about batteries!

In addition to your newly discovered treasures, all you need to get started is included in this kit (solar panel, motor and instruction). Your children can recycle a can of their favorite soft drink to create **Street Roller** and **Walking Robot**, create **Bottle Yacht**, **Drummer Robot** and **Flying Bird** using a plastic water bottle, and even turn your old scratched CD's into the super cool **CD Racer**.

Let's have our children play in an eco-friendly way, and learn to harness a new green solar energy source as well as implement the use of recycled materials. OWI invites you to participate in the creation of a sustainable future.

Suggested selling price: \$ 19.95 USD
