Solar Wild Boar

OWI, Inc.® - Let's work together to be a part of the larger conversation of energy efficiency and celebrate environmental friendliness and sustainability. Empower your children with the knowledge to make our world a better place to live. With that concept, OWI has fabricated a simple mini solar kit to engage curiosity and awareness.

In rural settings, people are urged not to leave rubbish to easy access of wild boars, but OWI's *Solar Wild Boar* is a fun-loving solar kit that smiles as it klippy-klocks around any mess. Building the 3.56 inch x 1.85 inch x 2.24 inch plus size figure, it is ideal for a do-it-yourself science fair, after-school, or summer workshop project with the bonus gift of learning mechanical transmission and electrical motor theory. Experts believe that the retention of child's learning experience is multiplied if they can coordinate reading with actual hands on experience. With only 47 assembly parts, it's a wonderful instrument for the beginner enthusiast 8 years and up, and a gateway to ignite opportunities in fun learning.

The *Solar Wild Boar's* appetite comes to life on sunny days making it the perfect outdoor companion.

Suggested selling price: \$ 14.95 USD
