OWI RobotiKits Introduces Salt Water Fuel Cell Giant Arachnid Kit

OWI, Inc.®, a leading supplier of fun, educational RobotiKits™ has added to their award-winning line of robot building kits for all levels of experience with the introduction of the brand new Salt Water Fuel Cell Giant Arachnid Kit.

Building on the success of OWI's award winning Salt Water Fuel Cell Car, the second generation appears to be just as dynamic...maybe a little frightening. The Salt Water Fuel Cell Giant Arachnid Kit gives children a chance to learn about new forms of clean energy, while building and powering their very own toy: Feed it saltwater and watch it scurry away!

This environmentally and kid-friendly concept reflects the new, cleaner ways we think about automobile production and demonstrates first hand to children a more effective utilization of our natural resources.

Kids will be awed by the remarkable simplicity and outright creepiness its eight-legged movement produces. After activating the fuel cell module with a saltwater mixture, the magnesium metal sheet (3 sheets included) can operate the Spider for about 5-7 hours continuously. Because of these life-like similarities, the user may want to stop this insectoid. It is easy, simply take out the fuel cell module and rinse with tap water and dry.

All the materials used in this kit are environmentally safe and clean, non-toxic substances or disposal concerns. It will not produce heat, so it is completely safe for child's play.

Dimension of assembled product: 1.77" (H) x 4.72" (W) x 4.33" (L)

Number of pieces: pieces

Assembly time: minutes

Suggested selling price: \$ 17.95 USD
