OWI RobotiKits Introduces Salt Water Fuel Cell Monster Truck Kit

OWI, Inc.®, a leading supplier of fun, educational RobotiKits™ has added to their award-winning line of robot building kits for all levels of experience with the introduction of the brand new Salt Water Fuel Cell Monster Truck Kit.

Building on the success of OWI's award winning Salt Water Fuel Cell Car, the second generation is definitely bigger and badder. The Salt Water Fuel Cell Monster Truck Kit is equipped with four-wheel drive mechanical construction. It easily handles different types of terrain by its twisted car body design. It has two transformable engine blocks: V engine or flat engine. The transparent case design allows children to see the rhythm of the piston in vertical or horizontal position. Each monster wheel can change its angle individually and the truck can change its height and shape. Forward and reverse...no problem; simply switch the "positive and negative" connectors. Pretty radical stuff... Oh, by the way, did we mention that it is fueled by salt water. The Salt Water Fuel Cell Monster Truck gives children a chance to learn about new forms of clean energy, while building and powering their very own kit: Just add saltwater and roar!

This environmentally and kid-friendly concept reflects the new, cleaner ways we think about automobile production and demonstrates first hand to children a more effective utilization of our natural resources.

Kids will be awed by the remarkable simplicity and effectiveness of the toy. After activating the fuel cell module with a saltwater mixture, the magnesium metal sheet (3 sheets included) can operate the car for about 5-7 hours continuously. If you want to park the vehicle, simply take out the fuel cell module and rinse with tap water and dry.

All the materials used in this kit are environmentally safe and clean, non-toxic substances or disposal concerns. It will not produce heat, so it is completely safe for child's play.

Dimension of assembled product: 3.52" (H) x 3.9"(W) x 4.72"(L)

Number of pieces: pieces

Assembly time: minutes

Suggested selling price: \$ 25.95
